RE: Summer internship

To whom it may concern:

The Institute of Advanced Science is reaching out to several different high schools throughout the region to announce that it will be accepting applications for its summer internship program for students that have a desire to work in the areas of physical, biological and chemical sciences, with focus on biotechnology. The internship comes with a \$500 stipend and is open to Juniors who will be entering their Senior Year Fall 2018.

This is a competitive internship which will require a letter of interest, a current resume, and a minimum of 3 references from an academic source (advisors, teachers, counselors, etc.) and any additional supporting information that may be useful in evaluating candidate's aptitude for research.

The deadline for submitting your application is April 15<sup>th</sup>.

We hope to have students who are accepted, participate in a research style environment with mentors in areas that will provide laboratory experience for those aspiring scholars in a practical area of science which the Institute offers.

Please forward information to the address above with Attn: Paul Lindo or email to the address listed in signature line.

Warmly,

Paul Lindo  
Director of Operations
