### Three-Months Online Skill Development Certificate Course on Applications of Digital Tools in Teaching & Learning Indian Languages (International Level Certificate Course)

#### ABOUT THE COURSE

Digital Literacy is the most sought after word of modern era. It can help the learner in her/his professional development, studying new skills and charting new career. Digital or IT based tools makes a person more competitive and better skilled. We at Maitreyi, had successfully launched a skill development course, "Applications of Digital Tools in Teaching & Learning Indian languages" in last session. The course was a big success and received huge response from the students. The certificate course is specifically designed keeping in mind the requirements of students studying **Languages** and **Social Sciences** and making them proficient in basic computer skills in general and also in relation to Indian languages. The course is three months long with 12 credits/modules and assessment criteria include weekly assignments and final examination. The registered student would be entitled to the certificate only after fulfilling eligibility criteria, successful submission of assignments and final examination marks.

#### HIGHLIGHTS

This year, with advent of online teaching, we are offering the course in two modes, Direct Learning Mode (DLM) and Self Learning Mode (SLM). The maximum number of students who can join the DLM mode will be 100 and Live sessions of various modules will be provided. The SLM will be a self-paced learning wherein students will be provided with videos of experts/course instructors. The participants are free to learn from these videos after completion of registration process. At the end of each session study material/PowerPoint presentation related to module will be provided. The number of students who can register through SLM mode is unlimited. The course is going to commence from 17<sup>th</sup> April, 2021. The platform for Live sessions will be on Zoom and assignments submission will be done through Google-Classroom.

#### BENEFITS

After successful completion of this course the participant would be able to understand comprehend and explore key concepts of any subject in any language.
